

Nexus AI Employee Copilot - Complete Project Roadmap

Project

AI Employee Copilot for automating HR, email, meetings, tasks, documents and reports using multiple AI agents.

Problem

Employees waste time on repetitive administrative work. Build an AI copilot that performs actions, not only answers.

Core Features

AI Chat, Document AI (RAG), Meeting Scheduler, Leave Management, Task Manager, Knowledge Search, Email Generator, Report Generator, Dashboard, Voice Assistant (bonus).

AI Agents

Router Agent, HR Agent, Email Agent, Meeting Agent, Task Agent, Document Agent, Knowledge Agent, Report Agent.

Pages

Login, Dashboard, AI Chat, Documents, Tasks, Reports, Settings.

Tech Stack

React, Tailwind CSS, shadcn/ui, Node.js, Express, PostgreSQL, LangChain, ChromaDB, Gemini API, Firebase/Clerk, Vercel, Render.

Architecture

React Dashboard -> Auth -> Router Agent -> Specialized Agents -> Knowledge Base -> ChromaDB/PostgreSQL -> Gemini API.

Database

Users, Tasks, Meetings, Leave, Documents, Reports tables.

7-Day Roadmap

Day1 Setup/UI; Day2 Auth+DB; Day3 AI Chat; Day4 RAG; Day5 HR/Task; Day6 Email/Meeting; Day7 Testing, Deployment, Demo.

Demo Flow

Upload document, ask policy, apply leave, schedule meeting, generate email, show dashboard.

Future Scope

MCP, Google Workspace, Microsoft 365, Slack, Teams, Voice, OCR, Analytics, Autonomous workflows.
